Directions

1. Read each item carefully.
2. Follow the directions to solve each problem.
3. Circle your final answer(s).

1. Write the division fact that this picture represents.

_____ ÷ _____ = _____

2. Add the numbers to find the sum.

197 + 128,650 + 4,039 = _____

3. Subtract the numbers to find the difference.

54,001 – 9,796 = _____

4. Multiply the numbers to find the product.

4 5
× 2 9

5. Multiply the numbers to find the product.

$$700 \times 2,563 = \underline{\hspace{2cm}}$$

6. Divide to find the quotient.

$$3 \overline{)502}$$

7. Write an equation (number sentence) to solve the problem.

It takes 3 eggs to make a cake. Find how many cakes you can make with 37 eggs.

8. Divide to find the quotient.

$$21 \overline{)42,098}$$
